

## Fields of Application

**QuMed 4337** is suitable for repair welding of corrosion resistant similar steels as well as steel cast, and difficult-to-weld steels.  
Repair welding and wear-resistant build-ups.

## Analysis

C	Si	Mn	Cr	Ni
0,12	0,4	1,8	30,0	9,0

## Standard / Mechanical Values

M.-Nr.: 1.4337

Tensile strength (Rm): 740 N/mm<sup>2</sup>

## Recommended for base materials

1.4762, 1.4085

## Applications/ Notes
